

Science Cycle A Y5/6

Light (Y6)

Lesson 1

How does light travel?

wavelength
light waves
visible
spectrum

Lesson 2

How can objects be seen by the eye?

reflect
reflection
retina

Lesson 3

Can you demonstrate how light travels?

angle of incidence
incident ray
refraction
angle of reflection
periscope

Lesson 4

Why do shadows represent the shape that cast them?

opaque
transparent
translucent
(previous language)

Lesson 5

How can light change into colours?

concave
convex
visible
spectrum
prism

Lesson 6

Assessment

What will we be learning about over the coming weeks?
