

Science Cycle B Y3/4

Rocks (Y3)

Lesson 1

What are the three main types of rock?

igneous
metamorphic
sedimentary

Lesson 2

How can you investigate the properties of different rocks?

marble
chalk
granite
durable
physical
properties

Lesson 3

What can you conclude for your results?

high/low
density
permeable
impermeable

Lesson 4

How are fossils formed?

lava
molten
rock
sediment
erosion

Lesson 5

How is soil made?

organic
matter
weathering
erosion
compost

Lesson 6

Do all soils have the same permeability? How are the different types useful in the real world?

particles
clay
Sand

Lesson 7

Assessment

What will we be learning about over the coming weeks?
