

# Computing Cycle A 3/4

## Data and information - Data Logging - Unit 4.4

### Lesson 1

How can data gathered over time be used to answer questions?

data  
table  
layout

### Lesson 2

How can we use a digital device to collect data automatically?

data logger  
input device  
sensor

### Lesson 3

How does a data logger collect 'data points' from sensors?

logging  
data point  
interval

### Lesson 4

How can a computer help us to analyse data?

analyse  
data set  
import  
export

### Lesson 5

How can we identify the data needed to answer questions?

data  
logged  
collection

### Lesson 6

How can we use data from sensors to answer questions?

analyse  
review  
conclusion

What will we be learning about over the coming weeks?
