

Computing Cycle B 5/6

Computer Science - Systems and searching - Unit 5.1

Lesson 1

How can computers be connected together to form systems?

system
connection
digital

Lesson 2

What are the roles of computer systems in our lives?

input
process
output

Lesson 3

How do we use a search engine?

search
search engine
refine

Lesson 4

How do search engines select results?

index
crawler
bot
search engine

Lesson 5

How are search results ranked?

ordering
ranking
algorithm

Lesson 6

Why is the order of results important?

+
Assessment

web crawler
content
creator

What will we be learning about over the coming weeks?
